

Weather or Not?

Southern Maine Aviation Flight Instructors Sue Tholen and John Gary will deliver an exclusive presentation intended to give the GA pilot an advantage when making "Go - No Go" decisions during preflight preparation. Don't miss this opportunity to review your weather knowledge as we discuss global circulation and air masses. Using Surface Analysis charts, we'll look at the result of air masses clashing. Refresh your understanding of the weather characteristics associated Cold, Warm, Stationary, and Occluded Fronts. We will also include a brief discussion on Mid Latitude Cyclones and Thunder Storms. Click on the link below to register TODAY!

Directions: Main Terminal building, same building as The Cockpit Café.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
